

ERA-Net Smart Grids Plus | Enhancing Transnational Cooperation From Local Trials Towards a European Knowledge Community

The ERA-Net Smart Grids Plus initiative provides a variety of possibilities and platforms to enhance the exchange and collaboration of European representatives in the field of Smart Grids. Find here a list of platforms that are open to stakeholders of the initiative.

ERA-Net Smart Grids Plus Partner Search & Matchmaking

This platform provides an opportunity to share cooperation interests and cooperation profiles at organisational and individual level. The platform can be used in various ways to enhance joint activities for forthcoming ERA-Net Smart Grids Plus calls.

See further details at:

www.b2match.eu/smartgridsplus

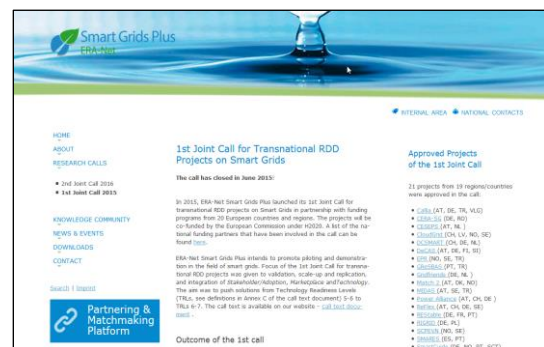

Project Profiles of 1st ERA-Net SG+ Joint Call

The ERA-Net SG+ website presents all projects that have been selected by the initiative for funding. Projects will be presented by project acronym and include abstracts and consortium details.

See further details at:

www.eranet-smartgridsplus.eu/research-calls/1st-joint-call-2015/

expera The Knowledge Sharing Platform

expera is the knowledge sharing platform of the ERA-Net Smart Grids Plus Knowledge Community. It allows registered users to share their knowledge with members of the ERA-Net Smart Grids Plus Community. Our Community includes representatives of industry, policy, research and other institutions as well as diverse smart grids initiatives, thereby installing a direct link between RDD initiatives, smart grids experts and decision-makers.

About ERA-Net Smart Grids Plus

ERA-Net Smart Grids Plus is an initiative of 21 European countries and regions.

The vision for Smart Grids in Europe is to create an electric power system that integrates renewable energies and enables flexible consumer and production technologies. This can help to shape an electricity grid with a high security of supply, coupled with low greenhouse gas emissions, at an affordable price. Our aim is to support the development of the technologies, market designs and customer adoptions that are necessary to reach this goal.

The initiative is providing a hub for the collaboration of European member-states.

It supports the coordination of funding partners, enabling joint funding of RDD projects. Beyond that ERA-Net SG+ builds up a knowledge community, involving key demo projects and experts from all over Europe, to organise the learning between projects and programs from the local level up to the European level.
