About ERA-Net Smart Energy Systems

ERA-Net Smart Energy Systems (ERA-Net SES) is a transnational joint programming platform of 30 national and regional funding partners for initiating co-creation and promoting energy system innovation. The network of owners and managers of national and regional public funding programs along the innovation chain provides a sustainable and service-oriented programming platform to finance projects in thematic areas like smart power grids, regional and local energy systems, heating and cooling networks, digital energy, smart services, etc.

Co-creating with partners that help to understand the needs of relevant stakeholders, we team up with intermediaries to provide an innovation eco-system supporting consortia for research, innovation, technical development, piloting and demonstration activities. These co-operations pave the way towards implementation in real-life environments and market introduction.

Beyond that, ERA-Net SES provides a knowledge community, involving key demo projects and experts from all over Europe, to facilitate learning between projects and programmes from the local level up to the European level.

Coordination

Austrian Ministry for Transport, Innovation and Technology

Coordinator: Michael Hübner

Partners

ERA-Net Smart Energy Systems is a partnership with funding programs.

A list of our cooperating national funding partners can be found here.

Supported by

ERA-Net Smart Grids Plus is supported by funding from the European Union's Horizon 2020 research and innovation programme.
